THE CAMBRO® STORY

Cambro was founded by two brothers, Bill and Argyle Campbell in 1951 when Bill invented the Camtray® and Argyle began selling the tray to the American Hospital Supply Corporation. The Camtray was quickly embraced by restaurant, hotel, school, and cafeteria operators, and it became the industry standard. Growing from this heritage, today we offer the most complete line of sizes, shapes, colors and materials in foodservice trays throughout the world.

Bill's creativity was the driving force behind new product development. During the 1960's, Cambro introduced Camcover® plate covers, drinkware, dinnerware and serving bowls to provide operators with long lasting tableware and serving items. Cambro also created the first plastic food pan and the first clear food storage container.

Cambro combined plastic molding with foam insulation in the early 1970's to create the first Camtainer®. This was the

beginning of our full line of insulated food and beverage containers that keep hot food hot or cold food cold for holding, transporting and catering.

Our tradition of innovation continues to this day. Every Cambro product is engineered to help foodservice operators increase sales and profits, reduce labor and improve safety. This has led us to industry innovations in storage, such as the FlipLid®, GripLid®, and SlidingLid™; in merchandising with the CamKiosk® and portable CamBars®; and with revolutionary products like the Camrack® closed-wall warewashing system, Camshelving® and thermoelectric Camtherm® holding cabinets.

In the late eighties, Cambro began to export. Cambro acquired Presswerk Kongen in 1997 and Ozay Manufacturing in 2004. We now manufacture a number of our products overseas to be marketed throughout Europe and Asia, respectively. All our products are available worldwide, and a global approach is a significant

part of our growth strategy.

Over the last fifty-eight years, Cambro has grown from one product, the Camtray, to thousands of products; from one salesman to a global sales and distribution network; from two presses in a small shop to a number of manufacturing capabilities around the world. Despite this extensive growth, we remain committed to creating and providing the most durable and highest quality products for the foodservice industry. And Argyle Campbell, the late Bill Campbell's son, stands at the helm of Cambro to continue the Campbell brothers' vision.

Visit www.cambro.com for a wide variety of information about our products including new product updates, an interactive Camrack Glass to Rack Guide, consultant cut sheets and CAD drawings, care and maintenance product guides and more.

Camshelving is covered by EU Patent #0686817.

EASY AND QUICK TO CLEAN

For a Sanitary Storage Area

- Shelf plates are easy to remove and run through the dishwasher.
- Smooth polypropylene surface quickly wipes clean.
- Spills clean quickly and easily, reducing the risk of cross-contamination.
- Camshelving® is weldless, so liquids and dirt cannot get inside crevices.

Shelf plates can be placed in an open end Camrack® OETR314 and washed in a commercial dishwasher.

- A silver-ion technology that inhibits the growth of mold, fungus and bacteria.
- Camguard works continuously to suppress the growth of microbes between cleanings.
- All shelf plates are embedded with Camguard antimicrobial so it will not scrape off, wash off or wear out.

STRONG AND DURABLE

Strong as Steel

- Posts and traverses are the weight bearing components, constructed with a steel core and encapsulated by a thick polypropylene outer layer.

- Inner steel core ensures that Camshelving is strong, durable and stable.
- Thick, polypropylene outer layer will not chip, break or corrode.
- Post connectors provide exceptional cross stabilization.

Weight bearing components are made with a steel core.

Dunnage Stands are used only on the bottom shelf. Recommended for traverses 54" (1380 mm) or longer.

Corner Connectors are recommended for use on traverses 48" (1220 mm) or less.

Due to the weight bearing capacity of casters, maximum weight load on an entire Mobile Camshelving Unit is 750 lbs. (340 Kg).

EASY TO ASSEMBLE & ADJUST

Build Any Configuration and Fit Any Size Area

- Create a space efficient layout for any area.
- Assembles in minutes, requiring only the use of a mallet.
- Shelves can be adjusted in 4" (100 mm) increments without disassembling the entire unit.
- Two units can be connected together with shelves at alternating heights for maximum storage flexibility.
- Corner Connectors attach units to create a 90° angle or U shape.

COMPONENTS

Camshelving® is a modular system that allows the flexibility to assemble shelving to fit any size area. The key components, including posts, post connectors, traverses and shelf plates, are available in a variety of

sizes. They can be easily configured to custom build shelving to maximize storage space. Unique design elements such as shared posts and corner connectors simplify assembly and increase storage capacity.

TRAVERSES

Traverses have a steel core with a polypropylene exterior to provide strength and durability.

Traverses connect to the post by sliding on to the dovetail on the post.

Two traverses are needed to build one shelf, and they define the length of the unit.

SHELF PLATES

Shelf Plates are made of polypropylene. Dishwasher safe.

POSTS FOR STATIONARY UNIT

Posts have a steel core with a polypropylene exterior to provide strength and durability.

Posts define the height of the shelving unit and are measured with the leveling foot fully engaged.

POST CONNECTORS

Post connectors hold two posts together and define the width of the unit.

They are made of polypropylene and provide excellent cross stabilization.

CASTERS

Available in standard for dry storage or premium for freezers, cold, or wet applications.

MAXIMIZE SPACE UTILIZATION

Camshelving® is available in starter and add-on units for ease of ordering and assembly.

Starter Units

- Available in stationary or mobile units.
- Starter units ship complete with two post kits, traverses and shelf plates to build an entire unit.

Add-On Units

- Add-On units ship complete with one post kit, traverses and shelf plates to attach to an adjoining unit.
- The traverses on both the first and second unit share the middle post.
- No add-on clips or S-hooks required.
- There is no loss of weight bearing capacity when built in a straight line.

Corner Unit & U Shape Units

- Corner connectors can be used to build corner units and U Shape units.
- Traverses snap onto corner connectors just like they snap onto the dovetails of the posts.

Corner Connector Set

- Attaches a basic unit to a second unit at a 90° angle or to form a U shape.
- A set of corner connectors are needed for each shelf.

* Corner connectors are recommended for use on traverses equal to or shorter than 48" (1220 mm), and covered by U.S. Patent D498,664S.

Dunnage Stand

- Increases weight bearing capacity to 1000 lbs. (454 kg) on the bottom shelf.
- Recommended for units 54" (1380 mm) or longer.

* Dunnage stands are covered by U.S. Patent US 6,981,454B2.

Fence System

- Prevents stored items from falling off shelving units.
- Ideal for mobile shelving.

Mobile Units

- Mobile Camshelving units are built by using posts for mobile carts and inserting casters.
- Mobile units are not designed to serve as transport carts.
- Casters sold separately.

Mobile unit shown with optional fencing.

Seismic Foot

- Bolts a post to the floor for a more stable base.
- Screws not included.

Wall Fastener

- Fastens a unit to a wall as a safety precaution.
- Screws not included.

Identification Tag

- Easily clips onto traverses to identify stored items.
- Made of PVC.
- Includes 12 HACCP labels.

Donut Bumper

- Protects mobile Camshelving.
- 3/2" (90 mm) Bumper.

CAMSHELVING® HIGH DENSITY STORAGE SYSTEM

High Density Camshelving is easy to assemble and configure. Camshelving stationary units act as the system anchor. Mobile units with vented shelves, exclusive high density casters, and track kits complete the system.

Maximize Storage Capacity

- High Density system utilizes all available space by eliminating aisles.
- Increases storage capacity by 30%-40%. Ideal for operations with limited storage space.

Easy to Clean

- Units can be cleaned without disassembling the entire unit.
- Shelf plates can be easily removed and run through the dishwasher.
- Raised track ensures dirt will not get trapped, and is easy to clean.

Easy to Order and Assemble:

1. Determine your room size and needs.
2. Choose starter unit size (pg. 70). Starter unit width must be 24". Existing Camshelving stationary units can be retrofitted and utilized as the anchors.
3. Choose High Density Mobile Units size (see chart below).
4. Determine number of track kits needed based on room length.

The track simply connects to the bottom of the Stationary Camshelving Unit. It is not necessary to drill into the floor to bolt the track down.

Active aisle of 36" provides easy access to all stored product.

Rail tracks provide a smooth and level surface to easily roll mobile units. Ideal for use on choppy or uneven floors.

Mobile units are positioned between two stationary units.

Grooved casters roll easily and securely on track. Donut bumpers protect casters against damage.

*High Density Mobile Units include 4 High Density Casters. **Weight bearing capacity of High Density Mobile Camshelving Units is 750 lbs. (340 kg). ***It is recommended to use Fencing with High Density Camshelving. Refer to page 74 for product details.

All necessary hardware is included in the track kit.

One-piece, welded rail and upright assembly available upon request.

CAMTHERM® ELECTRIC FOOD HOLDING CABINETS

Save Electricity with Camtherm!

In an independent laboratory test, Camtherm was tested against a same-capacity, leading metal cabinet for energy efficiency. Over the course of eight hours of holding, the Camtherm cabinet used 48% less electricity than a leading metal cabinet.

Total energy usage of the Camtherm Cabinet was 38% less than the metal cabinet when consumption was measured for preheating, loading, and the eight hour holding period.

Model	Total Energy Consumption Over 8 Hours
Camtherm	2.06 kilowatt hours
Metal Cabinet	3.95 kilowatt hours

Marine rail is designed for use during service, not transport.

Top marine rail on all units holds 2 full-size food pans, one sheet pan or one cutting board (CB1220).

Solar powered, digital display thermometer monitors internal cabinet temperature.

Self-ventilating cap on each cabinet door automatically releases steam and equalizes pressure, maintaining food quality.

Door swings open 270° for easy loading.

Menu clip holds routing directions or list of cabinet contents.

Ergonomic molded-in handles are at a safe height on both low and tall profile units for easy transporting, even when fully loaded.

Heavy-duty, 14 gauge electrical cord is 9' (274,3 cm) long. Wrapping hook is located on back of each cabinet for safe cord storage.

Wide, nylon door latches and magnetic door gaskets lock doors securely and create a tight seal to retain safe hot or cold food temperatures.

Non-marking, high modulus, rubber casters are strong and extremely durable, providing smooth transport of full cabinets from kitchen to serving location.

CAMTHERM® ELECTRIC FOOD HOLDING CABINETS

Cabinet exterior stays cool during operation.

Doors swing open 270° for easy loading.

Knuckle door hinges are built to withstand the rigors of numerous door openings. Doors lift up and off the hinges easily for cleaning.

Aluminum louvers gently and evenly direct hot or cold air around the entire cabinet and contents, eliminating hot or cold spots and maintaining food quality.

Easy-to-use control panel is located on back of each unit. Includes on/off switch, hot/cold switch for hot/cold units only and a temperature control dial for hot only. Cold performing units are factory set to chill cabinet to 37°F (2,8°C).

Anodized aluminum uprights and removable, adjustable chrome plated steel slide rails hold full-size food pans or sheet pans.

Tough, one-piece, seamless double-wall polyethylene exterior is easy to clean and won't dent, crack, rust, chip or break.

Energy efficient heating and/or cooling unit located on back of each cabinet. Low volt, low amp, low watt system maintains consistent hot or cold temperature and balanced humidity throughout the single cavity cabinet.

Molded-in bumpers protect walls and furniture and will never dent, chip or rust.
